## OUR JOB IS TO...

- Be your single point of contact for all your home design and building needs.
- Understand your home needs for today and the future.
- Develop a custom-tailored plan to meet your needs.
- Provide information on design, product availability and construction techniques so you know what is available.
- Prepare a detailed estimate of all costs.
- Help you select designers and contractors.
- Coordinate all aspects of your project.
- Ensure designer and craftsperson quality.
- Manage changes and monitor the budget.
- Make sure you do not pay for something you do not need or did not get.
- Make your house "home" for a lifetime.

## DESIGN AND BUILDING DEFINITIONS

*Universal design* – products, technologies and built environments that are accessible to and useable by everyone; sometimes referred to as "design-for-all".

*Accessible design* – products, technologies and built environments that are accessible to and useable by persons with disabilities, who otherwise would be denied access.

*Lifespan design* – products, technologies and built environments that accommodate, or can be adapted to accommodate, changes in ability and mobility throughout the life stage and age continuum.

*Adaptable design* – planning and construction that anticipates modification of a built environment in order to accommodate actual or potential changes in ability and mobility due to illness, injury or aging to support independent living; sometimes referred to as flexible, or flex, design.
